

The first tablet stand with integrated speakers

Dok! is the smartest mini Bluetooth speaker on the market, with high performance speakers built into a tablet docking station.

Dok! benefits from HD2A technology and passive radiators that provide rich, clear sound. Dok! transforms your tablet into a veritable portable cinema. Don't settle for just playing movies and videos – experience them, wherever you are.

High Definition Air Audio technology (HD2A) using 100% of Bluetooth bandwidth for audio data.

2.2 audio system with 2 passive speakers for deep bass and clear trebles.
